

illuminateTM

MANUFACTURING INTELLIGENCE

Industry 4.0 smart manufacturing system that provides critical insight into the essential machines, lines and processes that power and propel manufacturing

Single pane of glass

Monitor operations anytime and anywhere from our turnkey, integrated, and secure single-point platform

OEE in real-time

Capture real-time OEE intelligence across lines, machines, and locations for top down, bottom up continuous improvement

Visual KPIs

At-a-glance insight with dynamic charts & graphs of key data and metrics

Predictive maintenance

Improve equipment efficiency, yield, and lifespan through AI-driven predictive maintenance

Faster response times

Real-time notifications and alerts enable quicker corrective action

Unified communication

Keep operational team informed and engaged across shifts and locations

Part traceability

Track all components and their associated processes for each of your products through assembly and record it for process analysis, record keeping and compliance

INNOVATION CENTER
